## Brief History

**Founded in 1982 as one of the oldest multifinance company in Indonesia, the company has become a publicly listed company in 2019**

## Corporate Vision, Mission & Values

## Investment, Bridging, and Factoring Financing

We provides our customer with their capital investment financing to purchase their productive equipments and machinery.

For customers who need a short term project bridging finance, we are able to assist them as well.

We provide liquidity by providing factoring financing of our customers' receivables to help them with their urgent cash flow need for their business.

## Projects & Working Capital Financing

We provide our clients with working capital and projects financing that enable them to purchase raw materials, equipments and other necessities to complete and finish their projects within various infrastructure construction jobs.

Our experience team will arrange and structure the necessary financial modeling to ensure a smooth and uninterrupted cash flow necessary for the project completion.

We work closely with our customer in order to assist them with the timely project completion.

## Green (Renewable Projects) Financing

Our corporate commitment to help support a better and cleaner environmental for our planet motivate us to focus and grow our financing activities within the renewable energy projects.

We believe that the green renewable energy is the future and we put our our future effort to expand our financing activities within various green and renewable projects.

The thought of providing our earth with a clean and friendly environmental condition while doing our business give us a special satisfaction feeling.
